

Project Design Phase
Proposed Solution

Date	13 July 2026
Team ID	
Project Name	Customer Registry
Maximum Marks	2 Marks

Proposed Solution :

Project team shall fill the following information in the proposed solution

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Many organizations and small businesses struggle to manage customer records, complaints, support tickets, and follow-up activities because customer information is stored in spreadsheets or paper records. This leads to delayed responses, duplicate data, poor tracking, and reduced customer satisfaction.
2.	Idea / Solution description	Develop a Customer Care Registry , a centralized web-based application that enables organizations to manage customer information, complaints, support tickets, follow-up schedules, and analytics through a secure and user-friendly dashboard. The system improves efficiency, reduces manual work, and enhances customer service quality.
3.	Novelty / Uniqueness	The solution combines customer management, complaint tracking, follow-up reminders, dashboard analytics, and secure user authentication in a single, easy-to-use platform. It is designed specifically for small and medium-sized organizations that need an affordable and efficient customer management system.
4.	Social Impact / Customer Satisfaction	The system improves customer satisfaction by reducing response time, ensuring timely follow-ups, maintaining

		accurate customer records, and enabling organizations to provide faster and more reliable support services.
5.	Business Model (Revenue Model)	he application can follow a Software as a Service (SaaS) model with monthly or yearly subscription plans. A free basic version can be offered to small businesses, while premium plans provide advanced analytics, reporting, and additional features for larger organizations.
6.	Scalability of the Solution	The system is scalable and can support organizations of different sizes. Future enhancements may include AI-powered customer support, email and SMS notifications, mobile applications, CRM integration, cloud deployment, and multi-branch or multi-organization support.
